

## **Change of ACCREDIA logo - ITALCERT has a new accreditation number**

A new logo, a new brand, a new identity and a new website.

Detailed news on the site at [www.accredia.it](http://www.accredia.it).

Italian National Accreditation Body, ACCREDIA, has decided to adopt a new graphic design, with a change of look that includes new colors and new institutional and usage logos and brands for accredited entities, including ITALCERT S.r.l.

This change has an impact both on some documents issued by ITALCERT and on the use of the Accredia logo by certified entities in the schemes that require its use. The new Accredia logo will gradually replace the previous one:

When the Logo changing, Accredia has associated ITALCERT with a single identification number, which is valid for all accreditations held by ITALCERT.

This number is **00088**.

As an example, we report the Accredia logo that ITALCERT can use on its letterhead for relevant communications to activities carried out under accreditation:

00088

INSPECTION  
MANAGEMENT SYSTEM CERTIFICATION  
PERSONS CERTIFICATION  
PRODUCT CERTIFICATION  
TESTING

The new ACCREDIA logo that can be used only by companies certified by ITALCERT according to ISO 9001 – ISO 14001 – ISO 13485 – ISO 45001, and which will replace the previous one, is the following.

Following this change, ITALCERT has updated Regulation R002 which establishes the methods for using the logo and also the timing for the transition. ***The Regulation R002 and logos can be found in the documents section of this site for the management systems of interest.***

We would like to point out that, while for ITALCERT the transition period has a close limit, 09/30/2025, for certified companies that have the authorization to use the Accredia logo associated with that of ITALCERT the transition time is very long and ends on 12/31/2028.

In case of further clarifications, the ITALCERT staff is at your disposal.
